The diz1122 pin

## Self-service digital kiosks with integrated PIN terminal

Portrait screen  
shows 40% more  
of your webshop!

### Interactive kiosks in retail

Nowadays, all major retailers have a webshop in addition to their physical stores. Combining both results in a powerful omnichannel solution. Presenting products and services to customers in-store and enabling purchase using PIN terminals is possible with our digital in-store kiosks.

Interactive kiosks let customers browse and order products right from the sales floor. Customers can purchase items that are out of stock, and the kiosks can also offer additional sizes and colours that aren't carried in the store, as well as the option of home delivery. The consumer does not leave the store empty handed!

You can contact our sales team at any time for a non-binding offer.  
We would like to surprise you with our price-friendly solutions!

## Payment terminal

The front of the kiosk features a holder for a payment terminal. We integrate your point of sale payment terminal into this, giving you a self-service solution. We build in your payment terminal in accordance with all the applicable regulations, so a secure transaction is guaranteed.

## Security

With the use of SiteKiosk software, all our products can be easily secured against unlawful use. You can restrict access to the operating system, system settings, websites, files, folders, and applications. Your website and/or webshop will remain in view at all times.

## Android or Windows?

A compact Windows-based or Android-based PC is located in the locked hardware compartment. Using Android on a digital in-store kiosk offers many advantages. All GooglePlay store apps are possible, and all browsers can be used on the edge-to-edge touchscreen.

## 22" P-Cap multitouch monitor

Our molest-proof model diz1122 pin has an integrated 22-inch projective capacitive multi-touch monitor. The portrait screen shows 40% more of your webshop!

## Additional hardware

The in-store kiosk can be expanded with various hardware components such as a speaker set, barcode scanner, camera, microphone, keyboard, receipt printer, RFID reader etc.

The diz1122 pin is available in all RAL colors.
