

TABBELT...

A professional
tablet case for
intensive use

What is a Tabbelt®?

Tablets are both expensive and fragile. For that reason, good protection is very important. The Tabbelt provides this protection. A Tabbelt is a professional, custom-designed case made from durable leather. The main features of the tablet can all be operated without removing the tablet from the case. Ready for use in an instant.

How to use?

Using the Tabbelt is very simple. Just slide your tablet into the top of the Tabbelt, close it with the press stud and the Tabbelt is ready for use. The back of the case includes a strap with which to hold the tablet firmly in your hand during use. You can operate all the functions on your tablet without removing it from the Tabbelt. The same applies when charging the tablet.

Tabbelt® accessories

Like to work hands-free? In combination with some handy accessories, the Tabbelt can be easily attached to a matching belt or shoulder strap/lanyard, plus an extra belt to prevent it from falling. This way you can carry the Tabbelt hassle-free, all day long. These accessories also reduce the risk of theft.

Where to use?

The Tabbelt can be used in and outdoors, in a warehouse and in retail, healthcare and hospitality settings. In fact, the Tabbelt is ideal for any workplace that uses tablets. The Tabbelt is a professional case, specifically designed for use in the toughest of working environments.
